Gray**

** Except. EW20G, EW19, E25, E26, EW42

WEATHERABILITY EINWOOD® exhibits less colour fading than natural wood after years of service. The colour change may vary depending on the surrounding environment and the location of the installation; however, most colours fade slightly within 3-6 months of installation, and then no change will be seen after that. Fading is only at the surface, and will not affect the physical characteristics of the product.

WHY CHOOSE EINWOOD?

VERSATILE Einwood is available in a variety of shapes, sizes, and colors, and is curvable and coatable for creative designs and finishes.

MORE LIKE EXOTIC WOOD Constructed of a uniform material (no plastic outer layer, glues or solvents), Einwood has the softness, warmth and beauty of natural hardwood throughout, with the subtle color variations found in real wood.

MORE UV RESISTANCE AND WEATHERABILITY Uniform fusion of the wood and polypropylene before extrusion ensure that each board retains its mechanical properties indefinitely; Einwood will not weather, split, splinter or warp.

COLORFAST Pigments and anti-UV agents impregnated during manufacturing protect Einwood from discoloration.

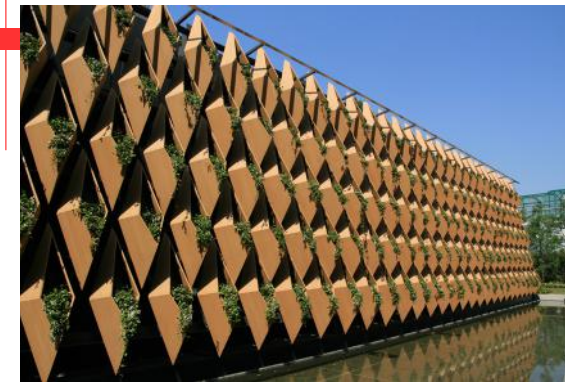

LOW MAINTENANCE Einwood is easy to clean with soap and water; stubborn stains can be removed with light sanding.

SMALLER CARBON FOOTPRINT Einwood is made from scrap wood and post-consumer polypropylene, and is itself recyclable. As a result, it has a smaller carbon footprint than natural hardwoods and composites made from virgin plastics.

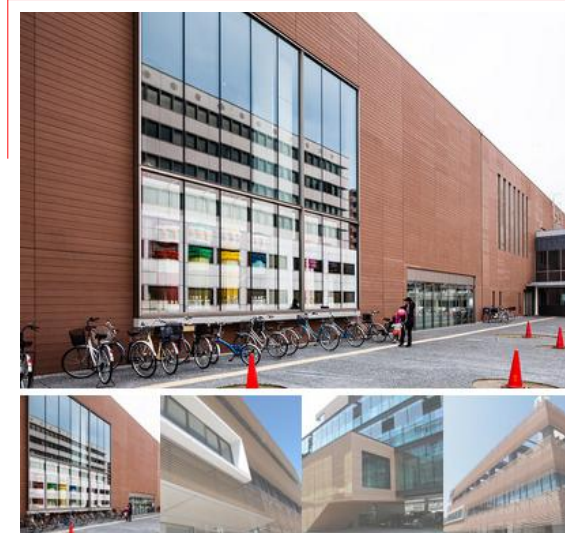

What can you design with Einwood?

EINWOOD

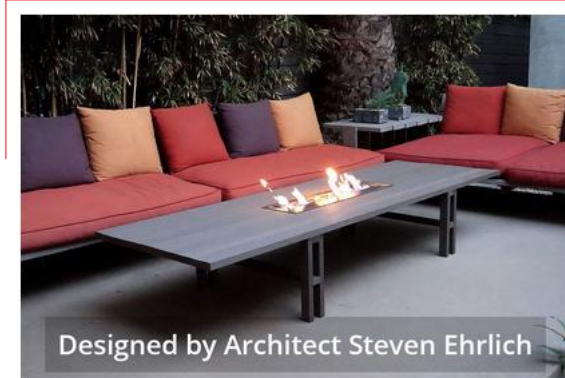

ARCHITECTURAL ELEMENTS With so many appearance and performance advantages, the true magic of Einwood lies in its versatility. Einwood is ideal for sunscreens, pergolas, accents, louvers, privacy walls, green walls and more.

CLADDING Our wood plastic composites are made for the architect who demands practical beauty. Einwood combines the warmth of wood with the durability of composites, creating stunning effects in vertical & horizontal facades.

DECKING Bring your vision for outdoor living to life in Einwood. It's versatile, durable, easy to maintain, and can take whatever shape you can dream up!

Designed by Architect Steven Ehrlich

INTERIOR & FURNITURE Einwood's versatility and practicality make it an exciting option for indoor applications such as overhead partial visual barriers, curved design elements, seating and glossy, decorative touches.
